

PLACEMENT CELL COMMITTEE

Function:

The cell functions continuously to monitor the employment potentials and arrange campus interviews for students. It maintains a consistent communication with leading organizations which conduct campus interview and selects graduate and post graduate students from all disciplines.

The placement cell serves to bridge the gap between a job applicant and a potential employer and aids the students to plan their careers by providing in-depth information about the companies which approach the college.

As far as training of students is concerned, training/workshops are organized with the intention of preparing the students for career development and campus selection programs.
